MEGAPIXEL RESOLUTION

Gocator 2300 sensors measure micron level features leveraging megapixel resolution while maintaining large fields of view. Gocator can now screen parts for very small defects, raising the bar for quality inspection.

STANDALONE & SCALABLE

Single sensors require no additional controllers, amplifiers or PCs. Gocator systems can effortlessly scale to multiple sensors using LMI Master hubs. Masters take care of power distribution, laser safety interlock, encoder and digital input handling, and microsecond synchronization.

COMPACT & LIGHT WEIGHT

Gocator's small footprint and less than 1.5 kg weight make it ideal for fitting into tight spaces and mounting onto robotic arms.

Gocator's browser-based graphical user interface

EASY TO USE

Gocator's built-in GUI allows for flexible configuration of profiling settings and measurement tools using any web browser, computer or operating system. With no additional software to install, Gocator's out of the box setup and configuration is fast and easy.
